HOW TO PLAY

How to Play

Roulette
TABLE LAYOUT

Roulette is one of the most popular and exciting games to play in the casino.

Roulette is a casino and gambling game named after the French word meaning “small wheel”.

In the game a croupier spins a wheel in one direction, then spins a ball in the opposite direction around a tilted circular surface running around the circumference of the wheel.

The ball eventually falls on to the wheel and into one of 37 colored and numbered pockets on the wheel.

How it Works

The main pockets are numbered from 1 to 36 alternating between red and black, but the pockets are not in numerical order around the wheel, and there are instances of consecutive numbers being the same color.

There is a green pocket numbered 0. Players can place a variety of ‘inside’ bets (*selecting the number of the pocket the ball will land in, or range of pockets based on their position*) and ‘outside’ bets (*including bets on various positional*

groupings of pockets, pocket colors, or whether it is odd or even).

The payout odds for each type of bet is based on its probability. The Roulette table has many different betting options and you can play as many or as few as you like.

There are usually posted rules for table minimum and maximum bets, and these rules usually apply separately for all of a players ‘inside’ and ‘outside’ bets for each spin.

Players can continue to place bets until the dealer announces “No more bets.”

The Golden Rule

As with all table games, if you are not sure about a bet or the rules of the game, just ask one of our friendly table games staff for assistance.

They will be happy to explain anything about the game that you may not understand.
